ORYX LUBES & GREASES LTD FZC
Quest for perfection

ABOUT US

Oryx Lubes and Greases Ltd. FZC (OLG) is one of the Middle East's leading manufacturers and exporters of lubricants. Backed by an experience of nearly 50 years, we are today known for our distinctive products and services in the automotive, industrial and marine segments.

Our quest for perfection ensures that we relentlessly innovate to deliver solutions that are second to none. We believe in the power of technology and understand the importance of staying up-to-date with market trends. To that end, our facility is equipped with advanced blending and filling machines, and our testing laboratory employs an assortment of testing

equipment like automatic viscometers and thermoelectrically cooled cold-cranking simulators, automatic titrator, and other sophisticated machinery to ensure product excellence.

All OLG products are produced in our own manufacturing unit that is spread in a 21,000-sq.m area in Hamriyah Free Zone, Sharjah, UAE. We use strong

core lubrication technology to offer superior products that adhere to strict quality measures and testing procedures. It's one of the many things that have helped us gain international recognition, a sound presence in India and Saudi Arabia, and a place amongst the trusted names in this industry.

OUR GOAL

A modern, curved metal staircase with glass railings, set against a light blue sky background. The staircase is the central focus, curving upwards and to the right. The steps are made of a dark metal with a textured surface. The railings are made of clear glass panels held by thin metal brackets. The background is a clear, light blue sky with a few wispy clouds. The overall mood is clean, modern, and aspirational.

Our goal is to relentlessly innovate in all areas of our operations thereby delivering world-class quality and establishing long-enduring relationships.

We aim to establish our position as a market leader in the MENA region and expand to meet the ever-changing demands of a global audience.

OUR BUSINESSES

OLG offers a wide range of lubricants that are guaranteed to perform and meet the demands of new-age engines. They adhere to international standards and have been recognised for their unwavering quality.

Gulfstar's range of lubricants delivers superior engine protection and performance. Its advanced formulation ensures reliability across every segment and comes in a wide range of grades and specifications; each individually formulated to meet the ever-changing requirements of the market.

To know more about Gulfstar and its range of products, visit www.gulfstarlubricants.com

Dextrol is a premium range of high-performance lubes specifically created with the automobile, industrial and marine segments in mind. It is formulated to match the technological brilliance and unique demands of today's high-end engines and equipment, all thanks to OLG's robust R&D and advanced manufacturing processes.

TURNKEY SOLUTIONS

OLG is powered by personnel with extensive experience both in the petroleum and petrochemicals industries. Our highly qualified teams of experts cover the entire engineering spectrum which includes mechanical, chemical, electrical, automation and civil engineers, along with finance and accounting professionals.

In line with our continuous pursuit for perfection, the team developed and patented an environment-friendly, efficient technology for the re-refining of used lubricants to produce good quality group I / group II oils. The group also has a successful track record in setting up Lube Oil manufacturing facilities to produce high quality products that meet the demands of new generation engines.

Some of our most successful projects include:

- 1: Southern Refineries Ltd., India
- 2: Tagat Al Sharq Al Saudi Factory, KSA
- 3: OLG, UAE

OUR FACILITY

OLG ventured into the Middle East to establish a strong presence amongst other pre-existing players. Building on their core strength and expertise, the company set up a lube blending facility in a prime location covering nearly 21,000-sq.m area in phase 1 of Hamriyah Free Zone in Sharjah, UAE.

Built at a cost of nearly AED 22 million, the entire facility was engineered by OLG with enough provision made for a future expansion of the facility to double its capacity. The unit also houses a fully equipped R&D wing which ensures consistent product quality.

THIRD PARTY BLENDING

OLG's new modern facility is now functioning and its capacity is not yet fully utilised. It has enough provision for expansion and for optimum use of the facility, OLG offers third party blending services to other brands as per the quality requirement stipulated by the third party.

BECOME A PARTNER

As an OLG distributor, you can benefit from the vast business opportunities that come with every OLG product. Rest assured, we will assist you every step of the way with tailor-made offers, tools and market knowledge that will help you increase your market share.
